1. Your evaluation of subject report series is most encouraging and leads us to suggest a method by which it may prove more useful to you.

2. If CIA identification with this publication were removed for field use, we feel there would be no objection to handling it as unclassified material.

3. Currently 288 copies of this report are disseminated, of which 150 copies are directed to [REDACTED] and of these, 125 are for [REDACTED] A similar arrangement exists for our report, Review of Communist Theoretical Journals, in which case 92 copies are printed with a sterile cover retaining the classification.

4. Therefore, to meet your needs for more widespread use of the Communist Revisionism and Dissidence series, we would suggest that, with your concurrence, we arrange with Printing Services Division for a separate sterile and unclassified printing of the report in the number of copies you may require.
